

SHELBY

Multi-Space Pay Station

Consumers parking in off-street lots and parking structures demand convenience, diverse payment options, and ease of use so they can park, pay, and go about their business. Parking operators require solutions that provide a high level of physical and data security, seamless integration with the rest of their parking operation, and features that maximize revenues while reducing operational costs. The SHELBY multi-space pay station combines advanced technology and intelligent design to simultaneously meet the needs of both groups.

SHELBY Features for Consumers

- Range of convenient payment options, such as coins, bills, credit cards, smart cards, value cards, campus cards, coupons, and even Pay-by-Phone
- Large color screen that is easy to read
- Prompts in multiple languages
- Coin change capabilities
- Ability to pay for parking or extend time at any pay station in the system

SHELBY Features for Parking Operators

- Theft-resistant design to protect coins, bills, and internal components
- PCI compliant and PA-DSS validated system ensures credit card data security
- Pay-and-Display, Pay-by-Space, and Pay-by-License Plate on the same pay station
- Remote configuration of rates and policies saves time and money
- Integration with leading parking technology partners for a complete solution
- Flexible rate structures, diverse payment options, and the elimination of 'piggybacking' can enable up to an 80 percent increase in revenue
- Reduced maintenance and collections costs
- Real-time credit card processing to reduce processing fees and eliminate bad debt
- Real-time reporting and alarming
- Complete audit trail and rich analytics

Integrated Parking Management

Parking is more than just pay stations, and Digital Payment Technologies (DPT) believes that complete and integrated parking management yields superior results. To that end, DPT has built its solutions around an open system architecture that allows integration with complementary best-in-class technology partners. A complete integration with leading space sensor, Pay-by-Phone, smart card, credit card processing, enforcement handheld, and license plate recognition (LPR) platforms allows DPT to consolidate payment information in its PCI compliant Enterprise Management System (EMS) back-end in order to conveniently present it to enforcement, accounting, citation management, accounting or other applications.
